

LINEWIZE MONITOR FOR EDUCATION

Advanced mental health protection for K-12

THE VALUE

Detect online mental health risks before they become real-life incidents.

The role of technology in schools has changed, expanding from just computers to curriculum and safety. As digital learning in the classroom expands, the need to protect children online has also become a key safety concern for educators.

Not only must schools ensure they have appropriate filtering in place, but also prevent cyberbullying and other concerns that might stem from a simple browser search. However, technology isn't the only answer, when combined with human interaction, it ensures that vulnerable students are protected.

It is a real-time digital threat detection solution that offers a 24/7/365 moderated service by a team of highly-trained specialists that monitor all alerts and will notify administrators based on the level of risk, making it easier to take appropriate actions at the appropriate time.

Administrators can have peace of mind knowing that they will receive timely alerts from one of our expert moderators if there is an incident of concern.

How does Linewize Monitor work?

It flags students at-risk based on what they do or say in their digital lives which teachers and parents often don't see, and which therefore often go unnoticed.

Using a combination of AI and a team of highly trained human moderators it finds and assesses risks in more categories and in more digital locations than any other solution of its kind.

Having Linewize Monitor as a tool has allowed us to help some of the most vulnerable students within our community and get them the assistance they need.

South Bound Brook District

KEY FEATURES

24/7 Real-time Alerts & Notifications

Risk assessments and notifications happen in real-time, including an email for serious alerts and a phone call for very serious alerts such as risk to health or life. All happens within minutes of the risk occurring.

Risk Assesses the Whole Screen

It is also the only solution of its kind to risk assess (either via AI or human moderation) the FULL SCREEN, not just the URL. This dramatically reduces false positives as well as provides valuable detail when deciding on the most appropriate support intervention for the child involved.

Works Online & Offline

Works offline, capturing risk events even when the device is disconnected from the internet (e.g. in poor signal areas, basements, or when the user has manually disconnected). As soon as the device reconnects to the internet, that data is transmitted to Linewize Monitor for analysis.

Detect Risks Across the Digital Space

It is the only solution of its kind to risk-assess (either via AI or human moderation) ANYTHING a student type, be it across the web, encrypted apps, or any digital document such as Word, not just online, or that which resides within Google Suite, or Microsoft.

No IT Burden

The solution is cloud-based and deployment is fast and straightforward, often taking just minutes. There is no IT burden and no ongoing technical administration.

Optimizes Staff Time

Provides the evidence for support specialists such as Guidance Counselors and School Liaison Officers to better plan and target their time and interventions, enabling more efficient management of an expert and expensive school resource.

Detects Risks in 7 Different Categories

Where some solutions focus on bullying, suicide, or violence, Linewize Monitor includes 7 different categories, providing the widest safety net in K-12 including violence, bullying suicide, drugs, abuse, extremism, oversharing and more.

No Time Consuming Administration

AI and human moderators work hand in hand to assess and remove false positives and alert you only to that which you need to know about. No trawling through alerts. No administrative burden. Gives you more time to focus on intervention and supporting students who need it.

Peace of Mind

No need to worry about what students are doing digitally. If there is a risk, we will notify you. And with a body of evidence to either share with parents, discuss with the student, and/or help decide the most appropriate support.

Get in Touch

If you would like to find out more about Linewize Monitor or have any questions, please GET IN TOUCH with our team of product specialists. **We'd be happy to help.**
